

IN THE SPECIFICATION

At page 1, please change the title to "ELONGATED CARRIER FOR BUMPER MEMBER".

At page 60, lines 2-7, please replace the abstract with

a) An elongated carrier for receiving a bumper member. In one illustrative embodiment, the
elongated carrier includes one or more walls with one or more inner surfaces that define at least part
of a cavity, and further includes a slot into the cavity. The slot is preferably defined by at least two
terminating ends of the one or more walls, wherein the two terminating ends are defined by
terminating end surfaces that are separate from the one or more inner surface of the one or more
walls. Preferably, at least one of the inner surfaces of the one or more walls has an inwardly
extending nub.
